PROJECTS

Data Visualization & Machine Learning Approaches | *Python, Pandas, NumPy, Matplotlib, Excel*

- Loaded and pre-processed a real-world supermarket sales dataset from Excel into Python using the Pandas library for data ingestion and manipulation.
- Performed exploratory data analysis (EDA) to identify sales trends, outliers, and distribution patterns across product categories.
- Created multi-type data visualizations (bar charts, histograms, scatter plots, line graphs) using Matplotlib for actionable business reporting.
- Applied NumPy for numerical computations and statistical analysis, demonstrating proficiency in the end-to-end data science pipeline.
- Documented insights and findings to communicate data-driven recommendations clearly to non-technical stakeholders.

Business Intelligence Dashboard — Tableau | *Tableau Desktop, Excel, Data Storytelling*

- Designed and developed an interactive BI dashboard for an online retail store to visualize annual revenue data and customer distribution.
- Built dynamic line charts for time-series revenue trends and pie charts for country-wise and customer-segment breakdowns in Tableau.
- Applied Tableau's calculated fields, measure names, and automatic aggregations to create responsive and drillable visual reports.
- Followed a structured project methodology: Framing the Business Scenario → Choosing the Right Visuals → Creating Effective Visuals → Communicating Insights & Analysis.
- Delivered actionable business insights that supported data-driven decision-making for retail operations.

WORK EXPERIENCE

Fresher — Open to Entry-Level Opportunities

- Completed hands-on academic projects simulating real-world data analysis and software development workflows.
- Available for internship, trainee, or entry-level developer / analyst positions immediately.
